

Childs' Dream: Dream #2

I was walking along and a whole bunch of animals were joining me. One of them was a shark, but he was a nice shark. We started to go over a suspended wooden plank bridge over a river and then the shark bounced up and down on the bridge and then I fell down into the water and was afraid I was going to die. And the shark was in the water. But i don't think that he meant to do it, because he was a friendly shark.

shark has "bounced" dreamer out of group, isolating dreamer with self and putting dreamer in a precarious and dangerous situation.

Dream Titles: Stay Out of the Water with the Shark! Don't Trust a Shark! Jaws is NOT Your Friend; Once a Shark, Always a Shark;

Dream Essence: What is the Shark? Card or pool shark - charlatan out to trick you out of your money; predator - someone who preys on others by singling them out and hunting them within their own territory where prey is not safe/has nowhere to go and no one to help them to be safe. hung out there. Dreamer - is deceived about shark's identity/role in his life (in denial) thinks it is a nice shark.

Sharing with the child??? Asking why they think that a shark is a friend. (As a parent) While child is sleeping, you could bless their spirit to be able to discern a good friend from a bad one. Might be a process. Watch behavior and friend patterns for changes. If none, pray and ask God for deeper revelation of roots of issue. Could start looking at their friendships and helping them look at their friends behavior and protect them from the bad friendships if they were not ablt to do this themselves. In the dream, the danger comes from being isolated and in over their head with the shark.
